

Genetic Health Referral Pathways

Research Study

Are you a health professional who works with Aboriginal and Torres Strait Islander patients that require access to Genetic Health Queensland (GHQ)?

Do you have an interest in developing access to GHQ?

If so, we would like your input and involvement in an upcoming research project* and workshop.

Aboriginal and Torres Strait Islander Queenslanders' accessing genetic health services is under-represented. By not ensuring coordinated care across the primary and specialist service sectors, the gap to healthcare access will widen.

The project goal: to consult with communities to create a preferred integrated care model and referral pathway, for improved access to genetic health services for Aboriginal and Torres Strait Islander patients.

Workshop Details:

Location: Wuchopperen Health Service, 6 Moignard Street,
Manoora, Cairns, 4870

Date: Wednesday 17th February 2021

Time: 10am-1pm

If you would like further information or
to attend the workshop please contact:
