The Australian Immunisation Register (AIR)

AIR Reports: for Pharmacies

Pharmacies can access AIR Reports on the AIR site using Health Professional Online Services (HPOS).

| Provider Digital Access (PRODA) is required to connect to and access HPOS.

🔗 <u>How to set up access to the AIR for your pharmacy</u>

Why should I use AIR Reports?

The reports, which can be downloaded and saved offline, can assist your pharmacy to:

- assess customers vaccine due and overdue dates

- reconcile vaccines given over a time period for payment purposes

- review vaccines given over a time period to reconcile payments under the <u>National Immunisation Program (NIP) Vaccinations in Pharmacies (VIP) Program</u>.

- provide help to customers needing assistance with their vaccination records.

For more information:

🔗 Go to <u>servicesaustralia.gov.au > AIR Reports</u>

🔗 View our <u>AIR Education Resources</u>

Which AIR Report should I use?

An individual's information is only included in the reports if your pharmacy has recorded a previous vaccination on AIR for them.

I want to...	Recommended Report
assess which of my customers may be due or overdue for a vaccination	AIR011B
view a summary of all COVID-19 (only) vaccinations a customer has received, and any vaccination exemptions recorded	AIR042A
view a summary of vaccinations provided to a customer/s to reconcile NIPVIP payments, or check that we recorded the correct vaccination information.	AIR043A

How can I customise my AIR Reports?

Report outputs can be customised to suit your needs and run on a scheduled basis (e.g. weekly). A reminder will be sent to your email address when they are ready for use.

💡 Set your email notification preference in **Provider Menu**.

Produced in Excel format, the contents can be:

- sorted
- filtered
- formatted.
