Activity Work Plan

Urgent Care Clinics

2022/23–2026/27

NQPHN acknowledges the Aboriginal and Torres Strait Islander peoples as Australia's First Nation Peoples and the Traditional Custodians of this land. We respect their continued connection to land and sea, country, kin, and community. We also pay our respect to their Elders past, present, and emerging as the custodians of knowledge and lore.

All activities captured in this Activity Work Plan are identified in the Health Needs Assessment conducted by Northern Queensland Primary Health Network (NQPHN) and have been approved by the Department of Health and Aged Care.

UCC-MUCC – 1 – Activity 1.1: Cairns Medicare UCC

Activity priorities and description

Program key priority areas

Urgent Care Clinics Program

Aim of activity

The aim of this activity is to support establishment and high-quality delivery of an urgent care centre in Cairns. It aims to increase accessibility to medical care when there is a need for urgent, but non-life-threatening, care and their routine general practitioner is not available to provide care in the time required.

Description of activity

Following NQPHN's comprehensive codesign in 2023, NQPHN will support ongoing relationship and referral pathway development between the Urgent Care Clinics, their local Hospital and Health Services, Queensland Ambulance Service, and local general practitioners.

Urgent Care Clinic was awarded to Edmonton Family Medical Centre following a competitive tender process, where they were deemed to meet the required design principles. Funding was allocated in line with the specified allocation (Annexure D – UCC Standard Funding Agreement).

Contract management will focus on the providers meeting and complying with the Urgent Care Clinic Operational Guidelines and Urgent Care Clinic Design Principles as developed and provided by the Department of Health and Aged Care and NQPHN. NQPHN will:

- support close cooperation between Medicare UCC, primary care services, and local emergency department and the local health system
- undertake local communication activities to increase community awareness and understanding of the available services and conditions that are appropriate to be managed at Medicare Urgent Care Clinics
- support Medicare Urgent Care Clinics in upskilling and refreshing practitioners in clinical competencies.

Whilst these activities are specific to the Cairns Urgent Care Clinic, the same process will apply and run concurrently with the establishment of the Queensland Health funded Townsville Medicare Urgent Care Clinic:

- NQPHN will notify Commonwealth of any contractual non-compliance (including Medicare UCC 19.2) and work with the Department of Health and Aged Care as required
- NQPHN will document, action, and notify the Commonwealth of any critical incidents in a timely manner
- NQPHN will continue to monitor risk and quality and safety, informing the Commonwealth where required.
