

PAEDIATRIC ASTHMA CARE MASTERCLASS:

ADDRESSING RELIEVER OVER-RELIANCE

JOIN US AT THIS LIVE 90-MINUTE WEBINAR ON 11 JUNE 2025

WA
4:30 – 6:00pm

SA/ NT
6:00 – 7:30pm

QLD/ NSW/ ACT/ VIC/ TAS
6:30 – 8:00pm

ABOUT THE EVENT

One of the greatest challenges in asthma care is the over-reliance on relievers, and these habits can start in early childhood, with consequences into adulthood.

This webinar aims to address the complex cycle of reliever over-reliance in children with asthma. Practical techniques in identifying sub-optimal asthma control, along with exploring psychological dependence on relievers and how to encourage best-practice asthma care will be discussed.

- Learn from a multidisciplinary panel across the asthma care spectrum with real-world insights from clinicians and families. Join colleagues nationwide at this interactive online event to enhance your skills and elevate your approach to paediatric asthma care.
- You will gain access to practical tools from Asthma Australia to integrate seamlessly into your daily clinical practice.

All registrants receive a link to the webinar recording. Certificates can be provided to self-report this activity for your Continuing Professional Development (CPD) according to APHRA and your National Board Registration Standards.
