Clinician Training

Migrant and Refugee Reproductive and Sexual Health: Culturally Responsive Clinical Practice

This full-day training will increase the competency and confidence of health care professionals in communicating with patients from refugee and migrant backgrounds in aspects of reproductive and sexual health (RSH). Participants will use their own clinical knowledge and background and apply it to a range of migration experiences including temporary, transient, permanent and time-specific migration and how they impact on reproductive and sexual health outcomes.

Topics will include: considerations for working with refugee and migrant individuals; communicating about contraception and sexual health; female genital mutilation/cutting (FGM/C); communicating with patients who have experienced or are experiencing torture, trauma and violence; engaging with intersections of gender, age, sexuality and gender diversity (LGBTIQ+), and disability.

Upcoming dates

Who is it for?

• General practitioners;
• Nursing staff;
• Midwives and birthing assistants;
• Allied health professionals;
• Gynaecologists and obstetricians;
• Clinic administration staff

Learning outcomes

• Develop strategies for conversations about reproductive and sexual health with individuals from migrant backgrounds;
• Explain the process of accessing interpreting services and how interpreters can impact the consultation to improve patient outcomes.
• Summarise how to respond to a disclosure about FGM/C;
• Articulate principles of trauma-informed care.

Course content

• Communicate with individuals from refugee and migrant backgrounds about RSH.
• Assist individuals to overcome barriers and navigate the health care system.
• Address stigmas and taboos to do with RSH.
• Work with interpreters and translators.

Course overview

This full-day face-to-face workshop will include discussion, case studies and interactive group work.
